

Is your WiFi '**WORKING**' for you? Does it inform, advertise or educate

Customers expect WiFi access and you provide it. But what does that access provide you?

Can you *promote your company*, advertise specials, announce something new? Can you pair access with a purchase, or place a limit on browsing time?

With your online Logic Hotspot account you can customize your WiFi gateway and *govern access* at any time.

Plug in our palm-sized router, and you're good to go. No contract, no fine print, just plug and play. And we stand by our equipment with a *lifetime guarantee*.
